500ml Aerosol with  
CO<sub>2</sub> Non-Flammable Propellant

[2007]  
'Food Grade'  
500ml Aerosol

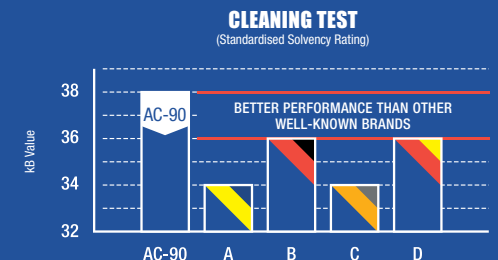

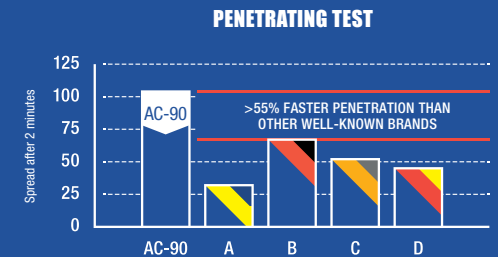

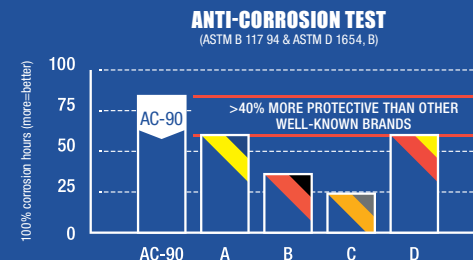

## TESTED. TRUSTED. APPROVED.

AC-90 has been developed to meet the exacting requirements of professional engineers and is manufactured in our own production facility under the control of ISO9001 and ISO14001 standards.

AC-90 gives you a one-can solution for many everyday tasks:

- AC-90 Cleans:** AC-90 can be used for the cleaning of almost all surfaces, including metal, rubber, vinyl, most plastics, and painted surfaces. It will effectively remove greases, heavy oils, waxes and more.
- AC-90 Lubricates:** AC-90 keeps moving parts working smoothly and effectively, eliminating stick-slip and improving operational efficiency. AC-90 does not contain silicone.
- AC-90 Penetrates & Releases:** AC-90 rapidly penetrates and releases seized, corroded and over-tightened fasteners, leaving a fine lubricating film for ease of reassembly and future protection.
- AC-90 Displaces Moisture:** AC-90 contains active ingredients which rapidly spread into microscopic surface irregularities displacing moisture and eliminating damp induced faults on ignition circuits.
- AC-90 Protects Against Rust:** AC-90 has excellent corrosion protection of metal parts and components, repelling atmospheric moisture and inhibiting flash-rusting.

## PRODUCT PERFORMANCE COMPARISON\*

\*Users should conduct application testing to ascertain product suitability. All information given in good faith but without warranty.

Fixed-in straw – no longer able to lose it!

**NEW**  
AC-90 TWIN-SPRAY

Recessed button helps prevent accidental discharge during transport or use

True multi-purpose product: cleans, protects, de-waters, lubricates, penetrates

Economical, long lasting 500ml can

Twin-Spray position:  
Precision Jet (up)  
Broad Spray (down)
