

TOGETHER, WE GET IT DONE.™

Paul Van Den Bulcke
Managing Director
CRC® Industries EMEIA

WELCOME TO OUR WORLD

Since its foundation as Corrosion Reaction Consultants with a single product in 1958, CRC® Industries has evolved over the years into a worldwide leader in the production of specialty chemicals for maintenance, repair and overhaul (MRO) for professionals and do-it-yourselfers, serving the industrial, automotive, heavy trucking, marine, electrical, hardware and aviation markets.

Today the company's products are sold throughout the US, Europe, South America and the Pacific Rim. CRC® operates a total of 19 locations with 7 production sites that produce millions of aerosol cans each year.

All around the world there's work being done, it never stops. In daylight hours and the darkness of night people are fixing broken parts, operating machines that help build the next big thing and ensuring that millions of goods are moving from one place to another. People are counting on you to get that work done and here at CRC, we understand the importance of our products as an integral part of your tool kit. Together, we get it done.

We deliver unique, high value solutions through continuous innovation of our MRO products, formulations and services that meet or exceed the expectations of our solution users, complying with all relevant (and changing) legislation. CRC® is ISO 9001 certified and adheres to the strictest guidelines for quality in all facets of research, development and production.

We offer best in class professional products and services that protect, preserve and maintain our customers' assets and operations safely and effectively. Wherever that may be.

THIS IS WHO WE ARE

CRC® Industries is a global leader in the production of aerosols for both the professional and the do-it-yourself market.

- We are a worldwide supplier of chemical products for the industry, automotive, consumer and service segments.
- Our company consists of five operating groups headquartered in the United States, Belgium, the United Kingdom, Australia and South Africa.
- The ISO 9001 certification of our manufacturing plants in Belgium, the United Kingdom and South Africa reflects the high priority we give in providing consistent quality to meet our customers' needs. CRC® Industries UK has also been awarded the ISO 14001 certification, recognizing its responsible environmental practice.
- We manufacture and supply cleaners, lubricants, anti-corrosion products, adhesives, welding products, additives, moulding and other specialty products... all for the EMEIA region (Europe, Middle East, India & Africa).
- We guarantee high quality products by following strict guidelines in all facets of research, development and production.
- We meet today's most stringent environmental and safety standards.
- We develop new products and continue to adapt existing products to meet the needs of our customers.

THE GLOBAL OPERATING PRINCIPLES WE VALUE MOST

TEAMWORK

We work together to quickly adapt to the everchanging needs of the market and achieve our goals together!

CUSTOMER FOCUS

We serve our customers better than anyone else, as they are the core of our business. It is easy to do business with us.

INNOVATION

We develop unique strategies by understanding and creating new opportunities in the marketplace and for our customers.

TOGETHER, WE GET IT DONE

Whether you're part of a maintenance team serving a city's electrical grid, a machine operator preparing the ground for a construction project, a mechanic doing a routine brake job, or a parent tuning the family bikes for a big Sunday ride, you've got people counting on you – you can count on us to help you on every job and in every project.

CRC® delivers high-value solutions that have been born in the work, tested in the work, to get the work done. Our products meet or exceed the expectations of our customers in the Industrial, Automotive, Consumer and Electrical markets.

OUR PROMISE TO YOU

CRC® offers best-in-class professional products and services that protect, preserve, and maintain your assets and operations **safely** and **effectively**.

We always treat others the way we want to be treated. We act in a respectful and responsible way towards all our stakeholders, including our customers, suppliers, colleagues and our environment. That's our golden rule.

QUALITY

We strive to continually improve the value and quality of our products and services to maximize customer satisfaction.

OWNERSHIP

Every CRC® employee has a 'voice' to take ownership and present ideas for growing our company and nurturing corporate pride.

RESOURCEFUL

We are committed to making things happen to drive growth as expected by our shareholders.

OUR ENVIRONMENTAL COMMITMENT & SOCIAL RESPONSIBILITY

Product stewardship is about manufacturers engaging in the commitment to reduce environmental, health, and safety impacts of their products throughout their whole lifespan.

SAFETY FIRST

The safety of our employees during the manufacture of all our products, as well as the minimization of health risk to our product users is of the utmost importance to CRC®. In our modern, open economy, chemicals require a thorough risk assessment before reaching the market. Communications on safe use happen throughout the supply chain via safety data sheets and product labels, and an efficient enforcement adds to products placed on the EU market respecting the high EU product standards.

MINIMAL ENVIRONMENTAL IMPACT

At CRC® we are committed to managing our environmental performance, preventing pollution, ensuring compliance with all applicable environmental legislation and delivering continual improvement. We are innovating continually to offer solutions that minimize environmental impacts.

ECOVADIS SILVER MEDAL

We now hold an EcoVadis SILVER Medal in recognition of our continuous Corporate Social Responsibility (CSR) and Sustainability efforts. CRC teams located around the world have worked together to deliver this significant upgrade in just 12 months, moving up from Bronze level, representing their commitment to CSR.

REGULATORY

- We continuously improve the environmental, health, safety and security knowledge and performance of our technologies, processes and products over their life cycles. That way, we avoid harm to people and the environment.
- We provide help and advice to foster the responsible management of chemicals by all those who manage and use them along the product chain.
- We offer a free of charge TDS & MSDS management system online called My CRC[®]. This helps our customers automatically to receive the most up to date safety information.
- CRC[®] has dedicated global Regulatory Compliance & Monitoring' teams to ensure that all CRC[®] products meet or exceed the strict standards set by relevant legislation and best-practice standards. With a strong team in EMEA, CRC[®] maintains continuity of supply, to the highest standards, as legislation changes.

OUR MARKETS

We serve different markets with MRO solutions that fit the specific needs of our customers in compliance with all the industry regulations.

CRC BRANDS IN THE EMEIA REGION

Corrosion Reaction Consultants (CRC®) was founded in 1958 with the introduction of 5-56® a Multi-Purpose Lubricant and Corrosion Inhibitor in one product.

Founded in 1960 in Germany, Kontakt Chemie is now a global brand with a wide range of products, specifically developed for electronics repair, maintenance, and manufacturing.

French market leader of specialty chemicals for electrical, industrial and electronic markets. Invented in 1966.

Products for all industrial maintenance and repair (MRO) and polymer applications. Founded in 1948 in the UK.

Professional grade products for engineers, the trades, and sub-contractors. The targeted range ensures easy product selection and 'right first time results'. Founded in 1965 in the UK.

Invented in 1950, Q20 is synonymous in South Africa, with lubrication, rust prevention, protection of your industrial and household goods, and moisture displacement.

OUR SERVICE

THE CUSTOMER FIRST

Our company is committed to serving our customers the very best way we can.

CRC® prides itself on having very strong in-house expertise in the fields of regulatory affairs, international trade, customs and compliance matters. The world is moving fast. The international economy and business environment are constantly changing. Digital business, customer self-service and customer experience are still gaining importance. Furthermore, there's a continued trend towards consolidation of our customers into larger pan-European or even global entities. All these fundamental approaches to how we do business remain as important as ever.

Therefore, CRC® continues to make great efforts to strengthen our service offer. Beside that, we keep investing in our EMEIA Customer Experience teams and building new digital capabilities. From an organizational point of view this means we are evolving from largely independently operating country-based organizations into a more harmonized regional EMEIA organization. At the same time we are expanding our activities beyond the current reactive customer service to (add) a more pro-active customer care approach. CRC®'s people are our biggest asset and we have brought together an EMEIA Customer Experience team to work on our customer care and service offer across the EMEIA region.
